Author Index

Abdul Ghani, A. G.	A computational fluid dynamics study on the effect of sterilization temperatures on bacteria deactivation and vitamin destruction	9–17
Agarwal, V. C.	Empirical relation for the effect of the shape of the capsules and the nose shape on the velocity ratio of heavy density capsules in a hydraulic pipeline	147–155
Andrews, J. D.	Reliability of sequential systems using the cause–consequence diagram method	207–220
Andrews, J.	Maintenance modelling for computer-based systems	221–231
Attenborough, K.	Predicted influences of changes in particle size distribution in pulverized coal on attenuation of sound	133–146
Axon, C. J.	It's not *what* you do, it's *why* you do it that makes the difference between engineering and science: the strategy and structure of process engineering in the United States	93–97
Bannister, R. H.	Condition monitoring of slow-speed rolling element bearings using stress waves	245–271
Beckett, S. T.	Milling, mixing and tempering—an engineering view of chocolate	1–8
Bergen, A.	Fundamental aspects of centrifugal membrane separation	355–365
Bowen, R. J.	Experimental and analytical study of thermal stresses during pipe freezing	63–77
Bridge, S. P.	A pneumatic gauging sensor for measuring the thickness of soft films	19–27
Brown, C. J.	Aspects of the elastic stability of walls in rectangular planform steel silos	165–176
Budair, M. O.	Statistical aspects of fouling processes	331–354
Chen, X. D.	A computational fluid dynamics study on the effect of sterilization temperatures on bacteria deactivation and vitamin destruction	9–17
Cirne, J. M. O. S.	Stresses from radial loads and external moments in spherical pressure vessels	99–109
da Costa Pereira Leal, R. A.	Stresses from radial loads and external moments in spherical pressure vessels	99–109
da Silva Gomes, J. F.	Stresses from radial loads and external moments in spherical pressure vessels	99–109
Davim, J. P.	Cutting force, tool wear and surface finish in drilling metal matrix composites	177–183
Djilali, N.	Fundamental aspects of centrifugal membrane separation	355–365
Dugan, J. B.	Maintenance modelling for computer-based systems	221–231
Duncan, C.	Stability of open-channel trickling-filter distributor arms	39–51
Edwards, I. J.	The impact of variable hazard rates on in-service reliability	233–242
Farid, M. M.	A computational fluid dynamics study on the effect of sterilization temperatures on bacteria deactivation and vitamin destruction	9–17
Feng, C.	Thermodynamic performance simulation of a twin-screw multiphase pump	157–163
Fichera, A.	Comparison of the dynamical behaviour of rectangular natural circulation loops	273–281
Foster, A. M.	Using advanced modelling techniques to reduce the cold spillage from retail display cabinets into supermarket stores to maintain customer comfort	29–38
Froghieri, M.	Comparison of the dynamical behaviour of rectangular natural circulation loops	273–281
Gogate, S. A.	Self-discharging flat-bottom centrifugal basket design	111–122
Hamdan, M. M.	Finite element and experimental analysis for the effect of elliptical chord shape on tubular T-joint strength	123–131
Hamed, A. F.	Finite element and experimental analysis for the effect of elliptical chord shape on tubular T-joint strength	123–131
Higham, E. H.	Fault detection and flow regime identification based on analysis of signal noise from electromagnetic flowmeters	283–294
Howell, J. A.	It's not *what* you do, it's *why* you do it that makes the difference between engineering and science: the strategy and structure of process engineering in the United States	93–97
Jamaludin, N.	Condition monitoring of slow-speed rolling element bearings using stress waves	245–271
Jones, I. A.	Stability of open-channel trickling-filter distributor arms	39–51
Keary, A. C.	Experimental and analytical study of thermal stresses during pipe freezing	63–77
Khalid, Y. A.	Finite element and experimental analysis for the effect of elliptical chord shape on tubular T-joint strength	123–131
Kim, C.-H.	An integrated use of IDEF0, IDEF3 and Petri net methods in support of business process modelling	317–329
Kubie, J.	Transient processes in a closed vessel due to injection of hot liquid sprays	79–91
Lewis, J. S.	Transient processes in a closed vessel due to injection of hot liquid sprays	79–91
Mathur, R.	Empirical relation for the effect of the shape of the capsules and the nose shape on the velocity ratio of heavy density capsules in a hydraulic pipeline	147–155
